

Joshua Group International - Literally, a breath of fresh air

Joshua Group International, a company operating out of Playa del Carmen, Mexico, was established by a group of Canadian real estate investors. The group took notice of the thriving economy brought about by the extensive real estate development and hotel projects in the Mayan Riviera, Mexico. More importantly, the group took even greater notice of the Mesoamerican Barrier Reef which runs from the northern tip of the Yucatan Peninsula all the way to Honduras. Joshua Group International specializes in ecologically-friendly hotel/resort real estate development in Playa del Carmen. The company's strong effort to promote protection of the environment, from working with government, development companies and real estate agencies to making financial contributions, has received much applause. Please visit www.JoshuaGroupInternational.com for more information.
